URGES SENATE NOT TO CONFIRM WOOD.

Senator Scott Makes Impassioned Appeal Against Appointment of President's Friend.

"HAS NOT BEEN VINDICATED."

Declares Accused Should Appear in Person to Answer Serious Charges Against His Courage and His Honor.

Washington, Jan. 11.-Senator Scott of the Senate Committee on Military Affairs has submitted in executive session of the Senate a review of the evidence introduced before the committee in the hearing on the nomination of Brigadier General Wood to be a Majer General.

Senator Scott quotes many points brought out against General Wood, particularly those in connection with charges that General Wood accepted gifts from the Jai Alai Company, a gambling institution of Havana, and was guilty of complicity with Major James E. Runcie in the preparation and publication of an article re flecting discreditably on Major General John R. Brocke, his ranking officer.

is prefaced with the statement that confirmation to so high a position as that of Major General should be made with due deliberation and the person to be confirmed should be highly qualified and in

firmed should be highly qualified and in every way worthy and above suspicion. Concerning nominations of this character, Senator Scott says:

"The President, the appointive power, is the Compander in Chief of the Army and Navy of the United States, and appointment in either of these come from him to those under him with peculiar force and power, in that what he says is to them the law, and complaint or criticism on their part are really acts of insubordination.

SENATE SAFEGUARDS ARMY. "These officers and men, thus cut off from the right of complaint, have a pecultar claim to be heard here in the matter of appointments affecting them. It

cultar claim to be heard here in the matter of appointments affecting them. It behooves every Senator to exercise his very best judgment, and do his utmost to throw every possible safeguard around this class of appointments, particularly when the act of the confirmation has the far-reaching effect that this will have."

Commenting on a statement in the brief of Senator Foraker, that it was President Mckinley who jumped General Wood over hundreds of officers in the army, Senator Scott, says:

"We are told that Augustus boasted that he found Rome of brick and left it of mkrble, and so, General Wood may boast that he found Cuba a den of filth and disease and left it with a sewerage system. This, however, goes to his credit as a physician and as a sanitary officer and does not, in any sense, show his fitness to command a body of troops. The evidence in this case quite clearly establishes the fact that he was appointed because of his supposed capacity as a Civil Governor, and there is much to throw doubt upon the question of whether even his appointment as a Brigadler General was not regretted by the President, and no one will believe that Mr. McKinley would ever have thought of promoting him to a Major General Wilson shows clearly the natural resentment that will axist if this wrong is done the army of the United States. It affects the ambitions of

clearly the natural resemment that will exist if this wrong is done the army of the United States. It affects the ambitions of scores of young men because of the youth of General Wood and the long time that he would remain at the head of the army. Referring to the conduct of General Wood toward his superior officer, General Brooke, Senator Scott says that the conduct of the the charge of disloyalty is clusion is that the charge of disloyalty is fully established by the evidence submit-ted.

Senator Scott adds:

WOOD'S INSUBORDINATION. "It must be borne in mind that during the whole time General Brooke and General Wood were serving in Cuba, General Wood was considered by his superior officer, General Brooke, if not engaged in conduct of insubordination, at least was not performing his duty as a loyal soldier should to his superior commanding officer. sonduct of mash soluty as a my should to his superior commanding officer. "Condone this conduct and a premium will be placed upon intrigue and discount placed upon the first and highest duty of a soldier—that of loyal support and uneuestioning obedience to the orders of his even by

superior officer."

In reference to the support given by General Wood to gambling games played in the Jai Alai Company's "Fronton," Senator Scott says it is shown by the testimony that General wood was an habitual attendant of the game, especially spending his Sundays there, on whic hdays the betting reached as high as \$50,000.

In closing his review, Senator Scott says:

WOOD SHOULD ANSWER.

"At the conclusion of the evidence of General Wilson, Senator Hanna asked hat General Wood be brought before the lenate Committee to answer the allega-

senate Committee to answer the allegations and accusations made against him and relieve himself from the unjust (as his friends claim) imputations and criticisms made against him. Quite a colloquy ensued, it being claimed by some for his champions that there was no reason for him to be heard; that nothing had been proved against him; that there was nothing for him to answer in a word, and that he was self-vindicated.

"This, I submit, was to me, and must be to every one, perfectly monstrous. When did it come about that this individual, a doctor in civil life, and a bloodies soldier in battle, if he ever saw a battle, has reached the exaited position that he is unlike other people, and is not to be accountable to anyone, not even to the Senate of the United States, and will not even honor it with his presence? Now, for my part, I want to say that it is due to General Wood, it is due to the President of the United States, that he should not only explain, but disprove, many of the statements made in the evidence now here for consideration before confirmation should be thought of. The fact that he is willing this investigation go on without personally meeting it like a man is, in itself, strong evidence to my mind that he is not made of material that goes to make up soldiers such as we need for our Major Generals and Chiefs of Staff.

ERAVE MAN WOULD RESIGN.

"The talk about the difficulty of his coming here is silly. It is simply evading coming here is silly. It is simply evading

"The talk about the difficulty of his coming here is silly. It is simply evading the question. The truth is, a brave and courageous man would rather resign a than allow his character to be besmirched, his conduct assailed, his motives impressed and his integrity and veracity sought to be impeached, if by giving up the same he could come in person and disprove the accusations made against him. "To my mind a most grievous injustice has been done in the preferment or General Wood over a hundred or more old army officers—officers who won distinction on many bloody battlefields—battlefields where more lives were lost and more prisoners taken in one day than during the entire Spanish-American war." than allow his character to be besmirched.

and the Consults themselves have indulged in mutual recriminations and charges that have made it evident to the State Department officials that there is need for a thorough investigation which will form the basis for a complete change of consulates in the Orient.

The system of extra-territorial jurisdiction conferred on the Consuls in the administration of the consular corps is believed to have become antiquated, and it probably will be necessary to frame some scheme in its piace that will reduce the almost autocratic powers of the Consuls and bring them into closer responsibility to the State Department.

The charges referred to are not new, but, as stated in preceding dispatches, relate to charge for manifests, rectification of commercial papers and the issue of identification papers to Chinese who have been going into the Phillippines.

Governor Taft long ago complained to Washington of the practice of loose methods of regulating the admission of Chinese to the Phillippines and of the opportunities for fraud involved.

NO DELAY IN MACHEN CASE.

REPUBLIC SPECIAL. Washington, Jan. 11.-No technical or unnecessary delay was the keynote of the first day of the trial of August W. Machen and his alleged accomplices in the Post-Office scandal.

Machen and his alleged accomplices in the Post-Office scandal.

Justice Pritchard of the Criminal Court, where the case is being heard, rendered a decision at the outset of considerable importance and significance, which allows the defendants collectively only ten challenges in the selection of the jury, the same number allowed to the Government. Counsel for the defendants argued that each one of the five should have ten challenges, making fifty in all.

The Government's lawyer. Holmes Contrad, making the leading argument, contended that this was unnecessary quibbling and tending toward delay. Justice Pritchard promptly decided that ten challenges were enough for each side, and the selection of a jury at once proceeded. "Not guilty," was the reply of each one of the defendants as Mr. Machen, Mr. and Mrs. Lorenz, Dillier B. and Samuel A. Groff were called on to plead to the charge of conspiracy to defraud the Government in connection with the sale of letter box fasteners.

Mr. Machen appeared in court calm and collected. In fact, the only one of the defendants to show any nervousness whatever was Mrs. Lorenz, and this wore off as progress was made in obtaining a jury.

pure. The critical ordeal through which the expectant mother must pass, however, is so fraught with dread, pain, suffering and danger, that the very thought of it fills her with apprehension and horror. There is no necessity for the reproduction of life to be either painful or dangerous. The use of Mother's Friend so prepares the system for the coming event that it is safely passed without any danger. This great and wonderful
